**Aim -** To implement Non-Restoring division algorithm using c-programming.

**Objective -**

1. To understand the working of Non-Restoring division algorithm.
2. To understand how to implement Non-Restoring division algorithm using cprogramming.

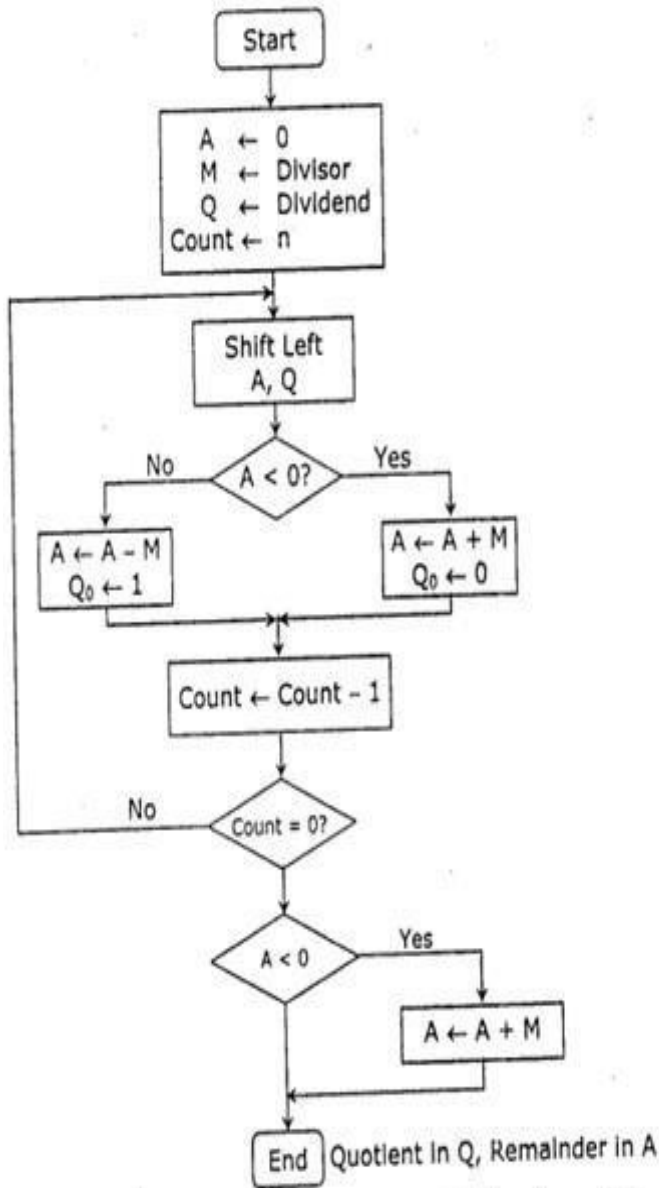

**Theory:**

In each cycle content of the register, A is first shifted and then the divisor is added or subtracted with the content of register A depending upon the sign of A. In this, there is no need of restoring, but if the remainder is negative then there is a need of restoring the remainder. This is the faster algorithm of division.

## Department of Artificial Intelligence & Data Science

Perform  $8 + 3$  by non-restoring division technique.

	A Register	Q Register	
Initially	0 0 0 0 0	1 0 0 0	
Shift	0 0 0 0 1	0 0 0 □	
Subtract	1 1 1 0 1		First Cycle
Set $Q_0$	1 1 1 1 0	0 0 0 0	
Shift	1 1 1 0 0	0 0 0 □	
Add	0 0 0 1 1		Second Cycle
Set $Q_0$	1 1 1 1 1	0 0 0 0	
Shift	1 1 1 1 0	0 0 0 □	
Add	0 0 0 1 1		Third Cycle
Set $Q_0$	0 0 0 0 1	0 0 0 1	
Shift	0 0 0 1 0	0 0 1 □	
Subtract	1 1 1 0 1		Fourth Cycle
Set $Q_0$	1 1 1 1 1	0 0 1 0	
Add	1 1 1 1 1		Quotient
	0 0 0 1 1		
	0 0 0 1 0		
	Remainder		

### Program -

```
#include <stdio.h>
```

```
void binaryPrint(int n, int bits) {
    for (int i = bits - 1; i >= 0; i--) {
        printf("%d", (n >> i) & 1);
    }
    printf("\n");
}
```

```
int main() {
    int M, Q, A;
    printf("Enter the divisor (M): ");
    scanf("%d", &M); printf("Enter
the dividend (Q): "); scanf("%d",
&Q); printf("Enter the number of
bits: "); scanf("%d", &n); count =
n;
```

```
    printf("\nInitial values:\n");
    printf("A: ");
    binaryPrint(A, n);
    printf("Q: ");
    binaryPrint(Q, n);
    printf("M: ");
    binaryPrint(M, n);
    printf("\n");
```

```
    while (count > 0) {
        A = (A << 1) | ((Q >> (n - 1)) & 1); Q
        = Q << 1;
```

```
        printf("After left shift:\n");
        printf("A: "); binaryPrint(A,
n); printf("Q: ");
        binaryPrint(Q, n);
```

```
        if (A >= 0) { A = A - M; printf("After
subtraction (A >= 0):\n");
        } else {
            A = A + M; printf("After addition
(A < 0):\n");
        }
    }
```

```
    printf("A: "); binaryPrint(A,
n);
```

```
    if (A >= 0) { Q
        = Q | 1;
    } else {
        Q = Q & ~(1);
    }
}
```

# Vidyavardhini's College of Engineering and Technology

## Department of Artificial Intelligence & Data Science

---

```
printf("After      updating
Q0:\n");      printf("A:  ");
binaryPrint(A, n); printf("Q:
");      binaryPrint(Q,  n);
printf("\n");

count--;
}

if (A < 0) { A = A + M; printf("Final correction (if A
< 0, add M to A):\n"); printf("A: ");
binaryPrint(A, n);
}

printf("\nFinal quotient (Q):
");      binaryPrint(Q,  n);
printf("Final remainder (A):
");      binaryPrint(A, n);
return 0;
}
```

**Output:**

Enter the divisor (M): 4  
Enter the dividend (Q): 2  
Enter the number of bits: 4

Initial values:

A: 0000  
Q: 0010  
M: 0100

After left shift:

A: 0000  
Q: 0100

After subtraction ( $A \geq 0$ ):

A: 1100

After updating Q0:

A: 1100  
Q: 0100

After left shift:

A: 1000  
Q: 1000

After addition ( $A < 0$ ):

A: 1100

After updating Q0:

A: 1100  
Q: 1000

After left shift:

A: 1001  
Q: 0000

After addition ( $A < 0$ ):

A: 1101

After updating Q0:

A: 1101  
Q: 0000

Final correction (if  $A < 0$ , add M to A):

A: 0010

Final quotient (Q): 0000

Final remainder (A): 0010

## **Conclusion -**

In this experiment, we successfully implemented the Non-Restoring Division Algorithm in C to divide two unsigned integers represented in binary form. The algorithm effectively demonstrates the process of binary arithmetic, including addition, subtraction, and bitwise shifting. Through stepby-step execution, we observed how the quotient and remainder are derived based on the initial dividend and divisor. This implementation not only reinforces the understanding of binary operations but also highlights the efficiency of Non-Restoring Division in handling division tasks without requiring restoration in every step. Overall, the experiment provides valuable insights into algorithm design and binary number manipulation in programming.
